

### **First Term Examination**

**Instructions:** Read the following passage CAREFULLY then do the tasks that follow.

Instagram is an online photo-sharing, video-sharing and social networking service that enables its users to take pictures and videos, apply digital filters to them, and share them on a variety of social networking services such as Facebook , threads, and X, formerly known as Twitter.

Instagram began its journey in October 2010, capturing imaginations with its distinctive square-shaped photographs, like digital snapshots mirroring the nostalgic vibes of Kodak Instamatics and Polaroids.

The service rapidly gained popularity. By December 2010, Instagram had 1 million registered users. In June 2011, Instagram announced it had 5 million users and it passed ten million in September of the same year. In April 2012, it was announced that over 30 million accounts were set up on the social network. Instagram recently made headlines with its efforts to keep the "Insta-universe" as a positive space and has prohibited any photographs that promote self-harm. By May 2012, the total number of photographs uploaded had exceeded one billion. Today, users unleash their creativity through personal photos, videos, live broadcasts, and even long-form IGTV content.

In my opinion, Instagram is a refuge for all of us; young and adults, who want to run away from the adults taking over Facebook. Either way which ever you choose they are both a fun and new way to interact and communicate with old friends and family and to make new friends from all around the world. It is one of the many advantages of the modern technology. If I had to choose one, I would choose Instagram; people are nicer here. However, Facebook was my first love, and who can forget their first love, looks like I am stuck in my love triangle for a long time.
